Preface

The Early Childhood Education (ECE) Syllabi have been developed to provide a national age-appropriate curriculum for children aged 3 to 5 years. The syllabi aim to provide quality education that is aligned with the Competence-Based Curriculum. Furthermore, the syllabi aim to impart the competences, knowledge, skills, values and positive attitudes that enable children to live and grow into productive and useful members of their communities and the Zambian society as a whole.

The syllabi comprise three learning areas:

1. Literacy and Language (in both English and Zambian Languages);
2. Pre-Mathematics and Science; and
3. Creative and Technology Studies.

The learning areas have integrated necessary content for early learning stimulation and accomplishment of the child's developmental milestones. The learning areas provided at this level are the same as those that will be offered at Lower Primary level. This is designed to promote and support the linkage between the Early Childhood and Primary Education.

The content provided in the syllabi facilitates holistic development of children's physical, mental, emotional, social, spiritual and moral faculties. The suggested activities are designed to offer children hands-on experiences through manipulation of real objects, interaction with nature and learning through play. Thus, the children will develop the competences needed for their personal and national development.

Cross-cutting themes such as National Values and Principles, Life Skills and Health Education, Climate Change and Financial Education have been incorporated in the syllabi to ensure that children cultivate a positive mindset that prepares them to live responsible lives and be protected from life threatening vices.

It is hoped that the syllabi will make learning at ECE level more meaningful and enjoyable as it is highly activity-oriented and allow for a smooth transition from home to the school.

Acknowledgements

The syllabi have been developed through a consultative and participatory process. Many individuals, institutions and organisations were consulted and accorded an opportunity to make proposals about the content to be included in the syllabi. We would, therefore, like to express our profound gratitude to individuals, institutions and organisations that provided the technical input to the successful development of this syllabi. These include; Teachers, Lecturers from Colleges of Education and Universities, Subject Associations, Civil Society Organisations, and Cooperating Partners. Special gratitude is extended to the Directorate of Early Childhood Education in the Ministry of Education for their invaluable input.

Finally, we appreciate the commitment and hard work of the staff at the Curriculum Development Centre in ensuring the successful completion of the syllabi development process.

1.1 ENGLISH LANGUAGE

INTRODUCTION

The English Language Syllabus for ECE (Levels 3-4 and 4-5) is designed to help children aged three to five develop the four language skills: listening, speaking, reading and writing. The syllabus has been developed to ensure consistent exposure to and practice of language. This will help learners become fluent and successful in academics as they progress to Grade 1 and beyond. This Syllabus is divided into two sections namely: Section A and Section B. Section A presents content for Level 3-4 whereas Section B contains content for Level 4-5.

STRUCTURE OF THE SYLLABUS

This syllabus is divided into three components namely; **Listening and Speaking**, **Pre-reading** and **Pre-writing**. Each of these components has a range of topics and corresponding sub-topics. In order to maintain a uniform and cohesive delivery of content to learners, specific–competences and their subsequent learning activities have been identified to facilitate effective learning. Additionally, the expected standards of performance have been clearly indicated as benchmark for the desired level of proficiency and achievement. This structured approach ensures a consistent and organised learning experience for all learners.

TEACHING METHODOLOGY

Finalised Copy

The Ministry of Education has suggested methodologies as a guide to teachers. In saying this, teachers are encouraged to use the best practices for their own classes and context to enhance learning outcomes.

Listening and Speaking Lessons: The teaching method suggested in this syllabus for listening and speaking **(Oral English**) follows the **three Ps' strategy – Present (The teacher will model the language for the day), Practice (Allow the learners to engage with the language in controlled practice activities),** and Produce **(Now allow the learners to use the language in communicative contexts independently).** The approach includes various methods like pair work, group activities, role-play, interactive language games, songs, rhymes, dialogue and conversation. Additionally, educators are encouraged to use a variety of teaching methods and techniques to enhance the foundation for development of Pre-reading and Pre-writing skills among learners. Teachers are encouraged to trans-language by using accommodation strategies such as code switching in instances where learners are not exposed to English as their first language. Teachers are encouraged to teach all components of Literacy and Language in English in one lesson and model all lessons using play strategies.

TIME ALLOCATION

Regarding time, 2 hours and 30 minutes per week (5 periods) are dedicated to Literacy and Language in English at the ECE level. Each period is 30 minutes as follows:

- Listening and speaking lessons (*oral lessons*) -3 Lessons of 30 minutes each per week
- Pre- reading lessons - 1 Lesson of 30 minutes each period per week
- Pre- writing lessons - 1 Lesson of 30 minutes each period per week

This time allocation gives enough practice for vocabulary and allows learners to engage in activities for a well-rounded language learning experience.

ASSESSMENT

Assessment in Early Childhood Education for English Language is essential for teachers to monitor learners' attainment

of developmental milestones and identify areas needing support. Teachers observe learners engage in conversations, play, and interactive activities, noting their developmental milestone in various areas and ability to understand and use language.

The key areas assessed at this level include:

1. Listening and speaking

- Oral interactive activities
- Retelling stories
- Picture descriptions
- Following instructions
- Responding to questions

2. Pre-reading

- Phonemic awareness
- Playing sound games
- Alphabet recognition
- Concept of print

3. Pre-writing

- Tracing
- Coping
- Colouring

ZAMBIAN LANGUAGES

ZAMBIAN LANGUAGES (3-4Years)

INTRODUCTION

The main focus of teaching Pre-Literacy and Language in Zambian Languages at nursery Level (3 to 4 years) is to develop the learners' oral language. However, other foundational skills in reading and writing will also be taught. This syllabus has been developed to ensure consistent exposure to and practice of language, thereby helping learners become fluent and successful in academics as they progress to Grade 1 and beyond. The Syllabus is divided into two sections namely; Section A and Section B. Section A presents content for Nursery Level (3-4 years) whereas Section B contains content for Reception Level (4-5 years).

STRUCTURE OF THE SYLLABUS:

The first section of this syllabus covers Nursery Level (3-4 years) while the second section covers reception level (4-5 years). In terms of content, this syllabus has the following components:

- Listening and Speaking
- Pre-reading and
- Pre-writing

These components will enhance the development of listening, speaking, pre-reading and pre-writing skills. Each component has specific competences that are to be achieved. The competences acquired at this level will prepare learners for learning at subsequent levels.

Although the components are presented separately in this syllabus, teachers are required to integrate them at lesson delivery. This entails that at preparation stage the syllabus should be broken down into schemes of work and weekly forecast which will contain these components – listening and speaking, pre- reading and pre- writing.

TEACHING METHODOLOGY

The teaching of Pre-Literacy and Language will follow the recommended approach of teaching key literacy skills which

Finalised Copy

include phonological and phonemic awareness, phonics, vocabulary, listening comprehension, pre-reading and pre-writing skills. Generally, lesson delivery should follow the **Gradual Release Model (GRM)**, where the teacher starts by demonstrating the activity, then doing the activity with the learners and finally learners doing the activity independently (I do, we do, you do). Furthermore, a variety of teaching techniques should be employed in order to meet different learning needs of learners.

LETTER SOUNDS AND SIMPLE WORDS

The teaching of letter sounds at ECE level has been restricted to sounds represented by single letters in a particular Zambian Language. Sounds represented by more than one letter will be introduced at Grade 1. This syllabus has also provided the sequence to be followed when introducing letters (see appendix 1). **The introduction of each letter sound should be preceded by phonological and phonemic awareness**. **Each letter sound should be taught for two weeks**. The teaching of phonological and phonemic awareness is restricted to simple ORAL words formed by **Vowel-Consonant-Vowel (VCV)** and **Consonant-Vowel-Consonant-Vowel (CVCV) structure.**

TIME ALLOCATION

Pre-Literacy and Language in Zambian Languages at ECE is allocated 2 hours 30 minutes per week. This translates into 5 periods of 30 minutes each in a week.

ASSESSMENT:

At Early Childhood Education level, assessment is an integral part of the whole teaching and learning process. In ensuring that the developmental milestones are achieved by the learners, assessment in Zambian languages will be done through observation and participation. This will include the four language skills, (listening, speaking, reading and writing). However, teachers are not limited to these but are encouraged to assess the learners through different modes as deemed necessary. Through assessment, teachers will be able to know each learner's ability and weakness and provide scaffolding where necessary.

2. CREATIVE AND TECHNOLOGY STUDIES

INTRODUCTION

Creative and Technology Studies Syllabus for ECE (Levels 3-4 and 4-5) is the combination of Art and Design, Design and Technology, Home Economics, Information and Communications Technology, Music, and Physical Education. It also integrates Social Studies and Cross Cutting issues such as financial education, entrepreneurship, environmental health and pollution management have been added. The focus of Creative and Technology Studies syllabus in Early Childhood Education is to promote creativity, critical thinking, problem solving, and positive inter – relationships, health and wellbeing, self-expression, self -confidence, awareness of space and assertiveness.

Learners manipulate different materials and respond to a variety of sensory experiences. The learner's creative work expresses their feelings and perception of the world. The work produced may not mean anything to an adult but may mean a lot to the child. Therefore, the effort that a child puts in an activity should be appreciated and commended. This is the appropriate age because, learners delight in exploring their surroundings by making, dismantling, examining and experimenting things. This is the main thrust of the learning area because it provides an opportunity for learners to use available materials.

STRUCTURE OF THE SYLLABUS

The syllabus is divided into two sections namely; Section A and Section B. Section A is for level 3-4 whereas Section B is for Level 4-5. At the beginning of each section (Section A and B) there are competences and descriptors to be developed by learners. For easy reference the syllabus is arranged as follows; topic, sub-topic, specific competence, learning activities and an expected standard.

Further, the syllabus has been outlined in such a manner that all the components of the subject (*Art and Design, Design and Technology, Home Economics, Information and Communications Technology, Music, and Physical Education and cross-cutting issues)* and some aspects of Social Studies are taught in an integrated manner. The teacher should be

Finalised Copy

conversant in all areas and lay a firm ground in the learners. However, it is envisaged that each school will have safe space/ground for all the components where learners will have to go and play. This will provide learners with an opportunity for hands-on activities and interact with peers.

SUGGESTED TEACHING METHODS

The approach to teaching and learning is the learner-centred. Therefore, in order to develop learners with understanding, skills and values that can contribute to the development of society, the starting point for teaching and learning is to recognise that learners come to school with a wealth of knowledge and experience gained from the family, community and through interaction with the environment. Thus, learning in school must build on the learner's prior knowledge and experience.

This is best achieved when learners are actively involved in the learning process. However, each learner has individual needs, pace of learning, experiences in life and abilities. To accommodate this, the teacher must determine the needs of the learners, and shape the learning experiences accordingly. Therefore, teaching methods must be varied but flexible within well-structured sequences of lessons and should include among others;

- Pair Work
- Group/Team Work
- Individual Work
- Field trip Method
- Project Method
- Discussion Method
- Guest Speaker
- Demonstration Method

Finalised Copy

The teacher should have reasons for choosing a particular teaching method and must employ strategies and techniques to make the lesson interesting.

TIME ALLOCATION

The standard period allocation for Creative and Technology Studies at Early Childhood Education level has been prescribed in the Zambia Education Curriculum Framework (ZECF) of 2023. The minimum learner-teacher contact time for Early Childhood Education is **5 hours** per week. The duration for a single period is **30 minutes.**

ASSESSMENT

There are no formal assessments provided at ECE level, as children develop at different rates at this level. Observational assessment ought to be a fundamental part of the programme. Therefore, the goal of both formative and summative assessments is to identify the developmental areas in a child that need more focused care as soon as it is practical.

School readiness assessment will be conducted at the preschool level before entry into Primary Education to determine both the developmental milestones and acquisition of key competences during the period children have been exposed to Early Childhood Education.
