VISION

Quality, life long education for all which is accessible, inclusive and relevant to individual, national and global needs and value systems

PREFACE

The Home Economics and Hospitality Syllabus has been developed by the need to provide a national curriculum for Zambia aligned with the competence-based curriculum and 21st Century Skills. It aims to impart the knowledge, skills, values, and positive attitudes that enable children to live and grow into productive and useful members of their communities and the Zambian society. This syllabus comprises of five components namely; Food and Nutrition, Hospitality Management, Health Education, Travel and Tourism, and Needlework and Crafts

The content/topics provided in this syllabus are aimed at facilitating the holistic development of children's creativity, initiative, problem-solving, physical, mental, and emotional skills among others. The suggested activities are designed to offer children hands-on experiences through the manipulation of real objects, interaction with nature, and learning through practice. Thus, the children will develop knowledge, desirable lifelong skills, values, and positive attitudes needed for their personal and national development

Cross-cutting themes and emerging issues such as Life Skills, Entrepreneurship, Climate Change, and Financial Education have been incorporated into the syllabus to ensure that children cultivate a mind-set, skills, values, and positive attitudes that prepare them for sustainability and suitability in the labour market.

It is envisaged that the syllabus will make learning at this level more meaningful and enjoyable as it is highly activity oriented and allows for a smooth transition at the primary school level.

ACKNOWLEDGMENT

The Home Economics and Hospitality syllabus reformation exercise would not have been accomplished without the involvement, participation, and commitment of many people. We want to thank them all. Most importantly we must thank the Home Economics Association of Zambia (HEAZ); Public and Private Universities, Colleges of Education; teachers from various private and government primary schools for their numerous contributions towards the curriculum reformation process. The Institute of Zambia Institute of Tourism and Hospitality and Tourism Studies (ZITHS) for providing reference materials and content when integrating the Hospitality and Tourism components.

Special thanks to all staff from our sister departments who were there during the process of development of the syllabi. We sincerely thank the Directorate of Secondary, the Directorate of National Science Centre, the Examinations Council of Zambia for their steadfast support.

INTRODUCTION

The current version of the Home Economics and Hospitality syllabus is a developed version of the 2013. It is developed in order to accommodate competence-based approach in teaching and learning. This syllabus puts more emphasis on learner centered approach which can develop learner's competences which include knowledge, skills and attitudes.

The reformed version has taken into consideration the current social, political, cultural, economic, global and technological changes as well as the emerging cross-cutting issues. Some of the topics from the previous syllabus have been retained, some enhanced and improved, while others have been omitted for various reasons. The organization of the developed syllabus differs from that of 2013. This has been improved by adding class level competencies and descriptors, and expected standards column per sub-topic.

The syllabus has been designed in such a way that learners will undertake Food and Nutrition, Hospitality Management, Health Education, Travel and Tourism, and Needlework and Crafts components. The learners will be assessed in all the aforesaid components in grade six (6), in both school-based assessments administered by the respective school and summative national examination to be administered by Examinations Council of Zambia (ECZ).

The syllabus is divided into two major parts; preliminary and subject content. The preliminary part consists of cover page, title page, copy right page, content page, aims and objectives of HEH. The content part of the syllabus includes the class level competences, class level and the content matrix. The matrix is made up of the following columns: topics, sub-topics, specific competences, teaching and learning activities, and expected standards.

RATIONALE

HEH has a direct relevance to the present and future life of every young person. Its purpose is to equip young people in certain important skills for living as individuals and of establishing and developing a stable environment for the nation and their families. It encompasses studies of many of the processes which are necessary for day to day living, particularly within the household and hospitality establishments. It is an interdisciplinary field of study which endeavors to equip learners with knowledge, practical and social skills, attitudes that are essential for success in a global society. The program seeks to equip learners with life skills that will help the recipient to cope with changes in a technological, socio-economical, and multi-cultural society.

HEH incorporates the components of Food and Nutrition, Hospitality and Tourism Management, Health Education, Needlework, and Crafts. New concepts of Hospitality, Travel and Tourism, Gender, Human Rights, Pollution, Entrepreneurship, and HIV and AIDS have been included. Learners engage in problem solving situations which require the application of knowledge and the use of practical skills. These situations take into account such factors as basic needs, lifestyles, financial resources, health, environment, and their effects on the individual, family, and society.

HEH inculcates positive attitudes towards cost effectiveness in the utilization of local and indigenous resources. It also looks closely at the use of other resources. The subject teaches learners to be self-reliant, business minded and health conscious. These challenges promote the well-being of the individual, family and the society.

This is due to the fact that HEH concepts are mainly introduced and taught within the concept of the home, the school, and the local environment therefore, making it easier for learners to easily and immediately apply whatever knowledge and skills at school in various phenomenon in their near environment.

SUGGESTED TEACHING METHODOLOGY

Teaching methods require a style of instruction that respects the need to acquire knowledge with emphasis on discovery, inquiry, and experiential approaches. The syllabus incorporates a variety of learner activities including:

- brainstorming;
- case studies;
- demonstrations;
- discussions;
- interviews;
- presentations;
- tutoring;
- role playing;
- simulation
- Team Work.

TIME ALLOCATION

Home Economics and Hospitality (HEH) (grade 4 to 6) is a purely hands on practical subject that lays a foundation for STEM subjects at Secondary School. This subject is also meant to equip all the learners with consumer education and entrepreneurship skills, as it is compulsory at Upper Primary School level. The learner-teacher contact time for HEH according to the 2023 Zambia Education Framework is 4 hurs 40 minutes per week. This translates into seven (7) periods of 40 minutes e

ASSESSMENT

School Based Assessment (SBA)

The purpose of SBA in Home Economics and Hospitality is to measure learners' achievement on a continuous basis in the prescribed competences outlined in the Zambia Curriculum Framework 2023. The SBA in Upper Primary section will run from Grade 4 to 6. SBA shall be compulsory to all learners at grades 4, 5 and 6 to enhance teaching and learning in class.
