VISION

Quality, life long education for all which is accessible, inclusive and relevant to individual, national and global needs and value systems

PREFACE

The **Social Studies Syllabus** has been reviewed to provide a national age-appropriate curriculum for learners in grades 4 to 6. The syllabus aims at providing quality education that is aligned with the **Competence-Based Curriculum** and 21st century skills. It also aims at imparting knowledge, skills, values, and positive attitudes that are aimed at enabling children to live and grow into productive and useful members of their communities and the Zambian society.

The topics provided in this syllabus are aimed at facilitating the holistic development of children's physical, mental, emotional, social, spiritual, and moral faculties. The suggested activities are designed to offer children hands-on experiences through manipulation of real objects and interaction with nature. Thus, the children will develop knowledge, desirable lifelong skills, values, and positive attitudes needed for their personal and national development.

Cross-cutting themes and emerging issues such as national values and principles, life skills and health education, climate change, and financial education have been incorporated into the syllabus to ensure that children cultivate a mindset, skills, values, and positive attitudes that prepare them to live responsible lives and be protected from life-threatening vices.

It is hoped that the syllabus will make learning at the upper primary school level more meaningful and enjoyable as it is highly activity- oriented and will allow the learners to use the knowledge, skills, and values acquired from this study area to help them in life and also assist them in facing the world with confidence.

MINISTRY OF EDUCATION

ACKNOWLEDGMENT

The design and development of the Upper Primary Social Studies Syllabus is the culmination of a series of activities which involved many stakeholders. I, therefore, wish to thank individuals, institutions and organisations that provided the technical input to the successful development of this syllabus. These include; the teachers, lecturers from colleges of education and universities as well as representatives from cooperating partners. I also wish to thank officials from the Directorate of Primary Education in the Ministry of Education for their valuable contribution to this process.

Finally, I would like to express my gratitude to the staff in the Directorate of Curriculum Development for their diligence and commitment in ensuring that the syllabus development process was concluded successfully.

Charles Ndakala, (Dr.)
Director – Directorate of Curriculum Development
MINISTRY OF EDUCATION

INTRODUCTION

The **Upper Primary Social Studies Syllabus**, Grade 4 to 6, covers components of *Civic Education, Geography, History and Religious Education*. The Syllabus integrates cross-cutting issues such as national values and principles, life skills and health education, corruption, governance which are aimed at shaping the moral up-bringing of a leaner.

Education is a vehicle through which a morally democratic learner should be developed. Thus, Social Studies is expected to be the mirror through which Zambian society should see itself in its quest and dedication to promote and perpetuate its social skills, beliefs, values, and traditions. Social Studies is a learning area that covers a number of aspects that include human behaviour, relationships, institutions, and resources. The learning area enables learners to use the acquired knowledge and skills to enable greater understanding of themselves, others, societies, institutions, nations, and environments.

This new curriculum emphasises that the learner should be at the centre of the education process. Therefore, it is envisioned that the learners should acquire essential competences; and think reflectively, logically, scientifically, creatively and critically so as to promote the formation of positive social behaviour and a socially desirable attitude. It is desired that the learner should have an education that will shape the development of a personally held set of civic, moral, and spiritual values as well as further the acquisition of knowledge and understanding of Zambia's democratic and cultural institutions.

Structure of the Syllabus

At the beginning of each grade level (4, 5, and 6), there are competences and descriptors to be developed by the learners. For easy reference, the syllabus is arranged as follows; the topic, sub-topic, specific competences, learning activities, and expected standard.

Suggested Teaching Methodology

The approach to teaching and learning is learner-centred. Therefore, in order to develop learners with understanding, skills, and values that can contribute to the development of society, the starting point for teaching and learning is to recognise that learners come to school

with a wealth of knowledge and experience gained from the family, community, and through interaction with the environment. Thus, learning in school must build on the learner's prior knowledge and experience.

This is best achieved when learners are actively involved in the learning process through *hands-on activities*. However, each learner has individual needs, pace of learning, experiences in life, and abilities. To accommodate this, the teacher must determine the needs of the learners and shape their learning experiences accordingly. Therefore, teaching methods must be varied but flexible within well-structured sequences of lessons and should include, among others:

- Working in Pairs
- Group/Team Work
- Individual Work
- Field trip Method
- Project Method
- Discussion Method
- Guest Speaker
- Demonstration Method
- Team Teaching
- Role play
- Debate

Time Allocation

The standard period allocation for social studies at upper primary levels has been prescribed in the Zambia Education Curriculum Framework (ZECF) of 2023. The minimum learner-teacher contact time for the upper primary school level (grades 4–6) is **3 hours and 20 minutes** per week, translating into **five (5) periods** for the **learning area**. The duration of a single period at this level is **40 minutes**.

Assessment

School Based Assessments (SBA) shall be compulsory to all learners in Grades 4, 5, and 6 to enhance teaching and learning in the classroom. The SBA will contribute 30 percent of the final mark in the final examinations. The 30 percent contribution shall be broken down as 10 percent at Grade 4, 10 percent at Grade 5, and 10 percent at Grade 6. The assessments will be set at school level by subject teachers as part of teaching and learning. The SBA component marks will be presented to the Examinations Council of Zambia (ECZ) in addition to the final score of the Grade 6 Composite Examinations.

Learners are expected to sit for summative examinations at the end of Grade 6 before proceeding to Form I.
